LEFT HIM GUESSING

INSPECTOR HAD NO ANSWER TO CUB'S RETORT.

Army Officer Relates How He Got Beautiful Setback from the Young Quartermaster of a Western Post.

"In an interchange of repartee, friendly or for blood, one can nearly always find some sort of answer in rebuttal," sald an army officer of the quartermaster's department, "but I got the finest flooring at a western SMILED AT THE WRONG TIME. post the other day you ever heard of.

the western post. Rather a classy young fellow, too, only eccentric. I suspect that what ails him is that he's

a bit of a genius. "About two years ago this young officer had a bad fit of sickness after his return from the Philippines, and it affected his head. In fact, he had to take sick leave for six months and go to an institution where people are treated for nervous prostration. At the end of his six months he was examined by a board of army surgeons. pronounced quite sane again-they gave him a certificate to that effectand he was restored to duty in the quartermaster's department. He was assigned to duty at this western

"He isn't much of a bookkeeper and his accounts got all pickled up a while ago, and so after a lot of futile correspondence the quartermaster's department fired me off to straighten the cub's accounts out.

"When I finished the job of straightening his accounts I proceeded as per orders to read a little piece or two from the riot act to him.

"'You've got to take a brace, son," I said to him, 'or they'll be coming down on you like a thousand of brick. They won't stand for another bunch of messed up accounts from you. You've got to get right down to it and keep these things straight if you lose a leg at the job.'

"Well, he's a decent boy, and all that, but when he proceeded to give me an argument about this gentle little lecture I couldn't help but call him. His idea of it was that the quartermaster's department's established method of having post accounts kept was all wrong, too laborious, involved, complicated, and so on, and he said he'd like to have the job of revising the department's old-fashioned meth, ods, as he called them. This particularly riled me.

"'You're dreaming, youngster,' I said to him. 'Dreaming or daft.'

"Then utterly forgetting that the young fellow had been out of his head in a sanitarium for quite a spell-of course I never would have made the remark if I'd remembered that-I added:

"Fact is, you're crazy as a loon." "The whelp knew that I wouldn't have said that had I remembered about his experience, and so he gazed at me without a bit of resentment in

his expression. "'Is that so?' he said to me, 'All the same, I'm the only man on this reservation who has got a certificate that he is absolutely sane.'

"I suppose that wasn't a hot one! It took me right off my pins. There wasn't a word to be said in reply to that, and the only thing I could do was to slouch away and make for some quiet spot where I could think

Deserved His Liberty. The smartest lunatic who ever escaped from an English asylum seems to be a well-known Hadley man. Wearing a silk hat and a frock coat, he walked into a newspaper office in Hadley and, after writing a thrilling story of how to elude the vigilant attendants at the Staffordshire county asylum, asked the editor to publish it. According to his story he walted for a foggy night and then, after loosening the screws in his cell window, descended to the ground by a rope ladder. He then visited Stockport and the poor law officers to look over the lunacy law. After learning that a lunatic could not be apprehended after 14 days of liberation unless a fresh order should be made out against him, he gave himself up to unrestrained celebration of the new year.

People who live in damp localities,

Use for Laurel and Sunflower.

particularly near undrained land, in France have discovered a simple remedy for damp situations. Successful experiments have shown that it is possible materially to improve the atmosphere in such neighborhoods by the planting of the laurel and the sunflower. The laurel gives off an abundance of ozone, while the sunflower is potent in destroying malarial conditions. These two, if planted on the most restricted scale in a garden or any ground close to the house, will be found speedily to increase the dryness and salubrity of the atmosphere.

Great Chilean Salt Deposits.

The salt deposits of Chile are the greatest in the world. The Salar Grande mine in the province of Tarapaca, about 60 miles south and east of Iquique, covers an area of 80,000 acres to the depth of 25 feet. This body of salt is nearly pure and contains more than 14,000,000,000 tons, or enough to supply the world's demands for many decades. There are several other deposits in the interior that cover two or three times the area of the above.

"This cub is the quartermaster at Overabundant Sense of Humor at Times Proves Costly.

Journey, who we are and to no mood stone. I not may show for myself hato be telled with. As he was page | Dissow of others who beyertakes Desel's ing through his apartments by slipped | P. R. + P. 8,125,716 Rheumatics In United States.

Can All Be Cured By Uric-o.

If rheumatism continues to spread as it has in the past few years, it would seem as though we would before long become a nation of cripples. The terrible destructiveness of this disease is apparent on every side of us. Almost nine out of ten of the cripples one meets had their affliction brought on by Rheumatism. How many thousands more there are that are hopelessly hed-riden and whom we never see. Rheumatism, from the very nature of the disease, can never cure itself and if neglected is bound to grow worse rather than better. If you ever have any twinges of Rheumatism, go to the druggist and get a bottle of Uric-O. The wonderful new Rheumatism, go its the druggist and get a bottle of Uric-O, the wonderful new Rheumatism, go its the following on the tax duplicate:
